

EARTHBOUND

PET

2019 - 2020

ABOUT US

Earthbound are a family business that have over 35 years' experience within the textile manufacturing trade.

The family business began with a focus on clothing for large scale 'make to order' contracts in the UK and overseas for some of the biggest retailers and wholesalers across European markets.

The business became a market leader in setting new trends and designs for the clothing lines that were produced.

It became further established due to its attention to detail, customer service and the quality of the products.

After many years focusing on the clothing trade the family changed the business direction to focus on a young and growing pet accessory market in the UK.

This was the start of Earthbound as a new business.

The initial aim was to transfer the skills and experience learned from the clothing trade across to the pet industry and to utilise the fabrics, styles and trends that had served the family well in the clothing trade.

The transfer across was seamless and the business has been growing ever since.

It is also now established as a market leader in the UK pet industry that is known for its quality, style and setting the trend.

Earthbound currently manufacture high quality pet bedding, blankets, dog coats, toys and other accessories.

The company prides itself on having all of the bed, blanket, bandana and dog coat ranges manufactured by Earthbound within the UK.

The aim is for all products to be durable, stylish, hardwearing and machine washable where possible.

They are designed with your pets in mind focusing on maximum comfort with some of the deepest filled cushions in bedding on the market today.

To ensure every product reaches the highest quality and standard that your pet demands we evaluate and test each product for long lasting durability, design, comfort and washability.

Earthbound as a business has been a huge success with growing demand for the business to move into new product areas that follow the same business philosophy and practices.

This has led to the development of an exciting new homeware range utilising the existing design fabrics and collections that have been developed within the pet accessory market while allowing them to be extended further into the home.

This new aspect of the business will also look to continually grow and aim to become a market leader in setting trends in the years to come.
